GET OFF THE X FRAME

Each process is manufactured and processed with domestic and international advanced equipment, and non-destructive equipment testing is performed on important parts; this ensures the reliability and stability of the vehicle under various complex working conditions.

HIGH-STRENGTH BODY

The use of three-dimensional CAD structural finite element analysis, simulation design of the load on the fuselage, etc., to achieve a reasonable high-strength structure. The high-strength left-right platform and high-rigidity turntable with enhanced thickness provide a guarantee for powerful excavation and high-speed walking.
